

TOWER-CIDE

Product # 630

Water-soluble microbiological growth inhibitor

This liquid additive is used to control algae, bacteria and fungi growth in recirculating commercial and industrial water cooling towers. It uses a non-volatile, polymer quat formula to restrict microbiological growth and keep cooling systems in top working condition. It's also concentrated, so it can be diluted for custom applications or frequent maintenance applications.

Use in Cooling Towers to Control:

- Algae
- Bacteria
- Fungi
- Slime
- Other deposits

Features and Benefits

- Prevents and controls microbiological growth in cooling systems.
- Non-volatile formula that will not evaporate out of solution.
- Excellent in both acid and alkaline cooling systems.
- Highly concentrated formula requires as little as 12 ppm to be effective.

Properties

Appearance.....	Yellow liquid
Fragrance.....	Mild odor
Concentrate.....	Yes
Specific gravity.....	1.02
pH.....	5.0-7.0

Directions Complete directions on product label

Initial Dose: Use 6.13 to 15.32 fluid ounces per 1,000 gallons of water.

Maintenance Dose: Add 1.53 to 15.32 ounces per 1,000 gallons every 2 to 5 days. The frequency of maintenance doses will depend upon the relative amounts of bleed off and severity of problem.

Authorizations

EPA registered product.

Active Ingredients

Poly [oxyethylene (dimethylimino)ethylene (dimethylimino)ethylene dichloride]

Amount Active

10.0%

Safety

Caution: Harmful if swallowed. Keep out of the reach of children.
